

Pollution poem:

We need to cherish every blade of grass,
Pollution, plastic I'll pass,
Climate change is affecting our lives,
Ruining everything that thrives,
The opportunity is here,
It's plastic we have to gear.

Reverse, recycle and reduce; this is what we need to do,
If you want a future for me and you,
The problems are alert,
This is what we need to divert.

Only to be 100% willing,
Because we are killing,
The future for our world,
Which will be shriveled up and curled,
If we don't act now,
Then the world will be gone, pow.

Please take this to mind,
When you next find,
A milk bottle or plastic cup,
Because we've really messed up,
We need to do this with direct urgency,
This is an emergency!
